

900/ 800 CLASS/ 2160WOG/ PN 150  
SIZE: 1/4"-6" (std.)

ZIPSON'S 305D, 3-piece high performance ball valve with ISO direct mounting pad is designed for the high pressure industrial pipe line in full port product. To compare the economic valve in the market, Zipson make valve structure & wall thickness totally follow ASME B16.34 standard. The exact structure make safe in the high performance application.

Super Teflon/ TFM1600 are the standard soft material and suitable for 2000 psi pressure rating from 1/4" to 2". For 2-1/2" to 4" full bore & 6" std. bore, 2000 psi rating, seat was required to be DELRIN (POM) or PEEK.

305D high pressure valve is with complete size range on 1/4" to 4" full bore (DN08-DN100) and 6" reduced bore (DN150). V-ball for ball valve type control valve are available for 15°, 60°, or 90° for different flow rate requirement.

305D high performance 3-piece ball valve can be with fire safe design with SS seat housing designed follow API607 Edition 4.

The standard bare stem type is well designed for mounting actuator directly with very low torque value. ZIPSON offer pneumatic/ electric actuator and limit switch box/ solenoid valve/ modulating controller....assembling without further charge.

Note 1: The greases ZIPSON use including lubricant & anti-seize grease are both SILICONE-FREE.

Note 2: Strongly suggest increasing at least 30%~40% for safety factor for mounting actuator.

**Suggestion!**

1. As dismantle the ball valve, don't forget to replace new Repair Kits, especially the gasket to prevent from leaking.
2. Before welding the valves, make sure the ends were dismantled. And welding the dismantled ends. After all the ends be cool, assemble the ends & use new gasket to prevent from leaking.
